PROFILE SUMMARY

Final-year Computer Science student with strong expertise in Core Java, Object-Oriented Programming, Collections, and Exception Handling. Hands-on experience in building RESTful services, working with SQL databases, and following Software Development Life Cycle (SDLC) practices. Proficient in debugging, troubleshooting, and writing clean, scalable code. Familiar with Spring Boot, Hibernate, and Agile methodologies. Eager to contribute to banking domain application development.

TECHNICAL SKILLS

Programming: Java (Core), SQL, Python

Frameworks: Spring Boot, Hibernate (JPA)

Concepts: OOP, Collections Framework, Exception Handling, Data Structures

Web & APIs: REST APIs, JSON, HTTP

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Maven

Methodologies: SDLC, Agile/Scrum (Basics)

EDUCATION

B.Tech in Computer Science Engineering

2022 – 2026

Narayana Engineering College, Nellore

CGPA: 8.2 / 10

EXPERIENCE

Software Development Intern

Jan 2026 – Jul 2026 Softurecs AI Labs Pvt Ltd, Hyderabad, India

- Developed and maintained scalable backend services using **Java** and **Spring Boot**.
- Built RESTful APIs and integrated them with frontend applications for seamless data flow.
- Worked on **AI-driven solutions**, including basic machine learning model integration and data processing.
- Optimized database queries using **SQL** and improved application performance.
- Collaborated with cross-functional teams using **Git** for version control and agile methodologies.
- Assisted in deploying applications on cloud platforms and monitoring performance.

Java Full Stack Developer Intern

Apr 2025 – Jun 2025

Edu Skills Academy

- Developed and maintained Java-based backend components and REST APIs.
- Implemented business logic using OOP principles, Collections, and Exception Handling.
- Worked with SQL databases (MySQL) for data storage, queries, and optimization.
- Assisted in debugging, troubleshooting, and resolving application issues.
- Participated in SDLC phases including development, testing, and documentation.
- Collaborated with cross-functional teams and followed coding standards and best practices.

PROJECTS

Smart Garage System (Service Booking Application)

- Designed and developed backend modules using Java and SQL.
- Built RESTful APIs for booking, service management, and user operations.
- Implemented data validation, exception handling, and optimized queries.
- Ensured code quality and scalability through modular design.

Traffic Signal Detection Bot

- Developed a machine learning-based system for traffic signal detection.
- Performed data preprocessing, model training, and evaluation using Python.
- Improved model accuracy through iterative testing and debugging.

ACHIEVEMENTS

- Solved 150+ Data Structures and Algorithms problems on coding platforms.

CERTIFICATIONS

- HackerRank – Java (Basic)
- Infosys Springboard – MERN Stack (Fundamentals)
